

BELLEVUE BAPTIST CHURCH

Bellevue Tutorial

Title: 5th / 6th "Press On" STEM Lab (Science, Technology, Engineering, Math)

Description:

Ever wanted to be a rocket scientist?

Build a Rube Goldberg machine?

Learn to Code?

If this sounds fun, then the Bellevue Tutorial STEM Lab is for you. Students will learn to think creatively, solve problems, and work together to build our STEM toolkit. This class time will be spent using our existing skills in science, technology, engineering, and math to create and solve each "weekly mission". Using critical thinking we will design the best solutions for each challenge and always work together to complete it.

STEM Lab is intended to be a supplemental science and math time for 5th and 6th grade students. Homeschool families will need to continue their core science and math schooling with their student outside of class.

STEM Lab has two different years of material to allow for 5th graders to return for another year of fun labs in 6th grade.

Prerequisites: Grades 5 / 6

Tuesdays 12:20 – 2:00 PM or Thursdays 10:10 – 11:40 AM; 32 weeks

Textbook: Tutor will provide materials.
