

Go! 1st & 2nd Grade Homeschool Program

Tuesdays or Thursdays – Starting August 8; \$1250; 32 weeks

Go! A Homeschool Day Out Program: 8:30 AM - 3:30 PM

Go! Create – Art:

Children love to create. In Go! Create students will find encouragement and instruction to express to the world the creations in their mind. Young students will learn the basics of drawing what they see and be introduced to the basic concepts of art to produce a lifelike drawing. Young students will also learn an overview of art styles and great artists from a historical perspective and study their work to inform our in-class projects.

Go! Examine – STEM:

Labs, puzzles, science challenges, and mysterious phenomena make science and STEM class a favorite for the young student. In Go! Examine STEM class students will start to explore creative thinking, problem solving, and team projects. We will develop and apply skills in science, technology, engineering, and math to create and solve each “weekly mission.” Exercising critical thinking skills, we will design the best solutions for each challenge and always work together to complete it.

Go! Explore – History:

History is full of amazing tales and harrowing feats just waiting for us to explore them. Go! Explore uses the popular and proven Story of the World history series to dive into an amazing world of historical people and events. Students will explore history and time periods through read aloud books, activities, games, and projects. Geography, maps, and timelines will also be introduced.

Go! Measure – Math Madness:

Math is loaded with opportunities for games and fun activities. From games to puzzles and beyond we will explore relevant mathematical concepts such as number lines, addition, subtraction, place value, measurement, time, basic probability identification, skip counting, and geometry concepts. We will play math games, use music and manipulatives, and have fun with many hands-on activities.

Go! Imagine – Language Arts:

Language Arts can and should be fun for the young student. In Go! Imagine we will introduce and practice basic concepts in reading, writing, and critical listening and speaking skills. Imagination is the key to creativity in young minds and our students will gain experience and confidence in the language arts through various modes of lessons, practice, and of course lots of games.

Go! Move – Physical Education:

Our physical bodies are a wondrous creation of God, and young bodies love to get out and move. In Go! Move we will learn about and drill a wide variety of games, sports, and other activities that we can experience through physical movement. Students will utilize age appropriate fitness activities including tumbling, simple games/relays, sport skills and other activities.
