

Course Title: Science 5 / 6

Description:

Young students are curious and they love to investigate the world around them. The Science 5/6 class is designed to give older elementary students the opportunity to explore and engage in the discipline of science. Elementary ages are a perfect time to introduce the proper method of inquiry, scientific investigation, and experimentation. We believe that keeping science fun and active can enhance learning and retention and grow an interest in science that can become a lifelong love.

In Science 5/6 students will use the Apologia Young Explorers Series, Exploring Creation with Chemistry and Physics to learn about matter, light, energy, motion, and other basic concepts in chemistry and physics. Students will begin to become more independent learners as they complete the at-home portion of their weekly assignments and notebooking journal entries.

Prerequisites: Grades 5-6

Thursdays 10:10-11:40 AM – Starting August 8; 32 weeks

Minimum 6 students required to start

Textbook:

Exploring Creation With Chemistry and Physics, by Jeannie Fulbright (Apologia)

Teacher:

Dana Perez-Williams; Contact Bellevue Tutorial, 901-347-5518, tutorial@bellevue.org

About the teacher:

Dana Williams-Perez has homeschooled for 12 years, she understands the importance of pouring a “True” education into young students. She has a passion for sharing the marvel of God’s creation with students. Dana earned her Degree in Nursing in 1987 and has been a Registered Nurse working in various areas of nursing. Dana earned her Bachelors in Science after graduating from Nursing School. Currently, she is working part time on her MSN in the field of Family Nurse Practitioner.
